EDUCATION

CUNY Hunter College *BA Computer Science | minor: Mathematics*

Expected Graduation: May 2024

TECHNICAL SKILLS

Programming: C++, Java, Python, JavaScript, Swift, SQL, HTML, CSS

Technologies: React, ReactNative, MySQL, PostgreSQL, Git/Github

Operating Systems: Windows, macOS, Linux

EXPERIENCE

Startup

Jun 2023 - Sep 2023

- Contributed as a full-stack developer on a mobile application project aimed at connecting people through social events. Collaborated effectively with a team of three to overcome development challenges and improve the application's performance. Gained proficiency in technologies such as MongoDB, React Native, Express, and Node.js

CodePath (Swift) - Tech-Fellow

Jan 2023 - Mar 2023

- Worked as a Tech-Fellow to run the iOS Development Program through zoom with other Tech fellows remotely through zoom. We taught the fundamentals of iOS Development to 60+ students and provide any assistance needed through emails or slack throughout the course.

After-School Tutor

Mar 2020- May 2021

- Tutored a High School student mathematics throughout the pandemic and helped her achieve 710 on the math section of SAT

PROJECTS

Read and Tell (Swift) (Won 3rd place out of more than 50 teams in CodePath's National Demo Day)

- Uses the NY-Times API to display books where the user can rate and leave a review, as well as add books to their collection.

E-commerce Website (React)

- A full-stack react website where users can sell, buy or rent clothes, shoes, and accessories.
- Users can easily perform crud operations on the items they post for sale or rent. I used AWS dynamoDB to store my data. I created an API using API-gateway and I used Lambda to interact with dynamoDB. I used axios on react to interact with the API.

Garage, Vehicle Management System (C++)

- A system to manage different kinds of vehicles in a virtual garage database

Twitter iOS (Swift)

- Clone of Twitter using twitter's API.
